

Yohanis Tadese

Full Stack Developer | React | Node.js | TypeScript | Python

Addis Ababa, Ethiopia · +251 924 316 889 · yohanistadese06@gmail.com · Portfolio · LinkedIn · GitHub

ABOUT ME

Full Stack Developer with 3+ years of experience building production web, mobile, and AI-powered applications for international clients. Experienced with React, React Native, Node.js, TypeScript, Python, PostgreSQL, and Redis. I turn business requirements and legacy systems into reliable, scalable software and work across the full development lifecycle—from architecture and implementation to deployment and production support.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Backend: Node.js, Express, NestJS, FastAPI, REST APIs, Socket.IO

AI: OpenAI, Claude, RAG, agents, embeddings, OCR

Integrations: Stripe, QuickBooks, DocuSign, n8n

Engineering: System design, requirements analysis, project delivery, stakeholder communication, production support

Frontend: React, React Native, Expo, Next.js, Tailwind CSS

Databases: PostgreSQL, Prisma, Redis, Milvus

Cloud: AWS, GCP, Docker, Linux, Nginx, CI/CD

Deployment: Vercel, Netlify, Heroku, VPS

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer

Nov 2025 - Present

GeniusAI · California, USA (Remote)

- Modernized legacy business systems into secure, multi-tenant web and mobile platforms using React, React Native, Node.js, and PostgreSQL.
- Built AI-powered capabilities, real-time operational workflows, billing systems, and production reporting for international clients.
- Delivered 30+ production reports covering dispatch, invoicing, impound, auction, lien, and operational performance.
- Architected a RAG-based support assistant using embeddings and OpenAI models to automate company-knowledge queries.
- Worked directly with US stakeholders from requirements and architecture through delivery and production support.

Backend Software Engineer

Dec 2024 - Nov 2025

Startup Agile · Addis Ababa, Ethiopia

- Developed scalable backend services and AI-powered products across gaming, real estate, education, and fintech.
- Redesigned high-volume backend architecture processing thousands of transactions and large external-provider payloads.
- Optimized PostgreSQL data access and introduced Redis caching to reduce unnecessary database operations.
- Integrated Stripe, DocuSign, OpenAI, Telegram, n8n, and Python-based AI services into production applications.
- Managed cloud deployments, debugging, system integrations, and performance improvements across client platforms.

EDUCATION

Bachelor of Science in Information Systems

Jul 2020 - Jul 2024

Haramaya University · Ethiopia

SELECTED PROJECTS

GeniusAI • Selected Projects

FoxTow Mobile App

React Native • Expo • Socket.IO • Google Maps

Mobile towing operations application for Android.

- Developed dispatch, driver, vehicle, impound, lien, invoicing, payment, digital-signature, and PDF receipt workflows.
- Built live fleet tracking with GPS and Socket.IO; integrated OCR, scanning, push notifications, Redux Toolkit, Redux Persist, and React Query.

FoxTow Web

React • TypeScript • Express • Prisma • PostgreSQL

Enterprise towing and impound management platform.

- Transformed a 30-year-old Visual FoxPro/dBASE desktop system into a cloud-based, multi-tenant platform supporting simultaneous remote access.
- Implemented real-time dispatch, storage billing, Stripe, QuickBooks, 2FA, automated backups, and 30+ PDF/Excel reports.

ProPhone CRM

React • TypeScript • Node.js • PostgreSQL • Prisma

Full-stack sales, lead, and customer engagement platform.

- Led the development team by translating business requirements into technical plans, coordinating implementation, reviewing work, and managing delivery.
- Built lead pipelines, bulk assignment, tagging, activity histories, AI-assisted data imports, questionnaires, and email campaigns.
- Implemented dashboards, JWT authentication, role-based permissions, recipient tracking, and organization-level data isolation.

Startup Agile • Selected Projects

Kiron

Node.js • PostgreSQL • Redis • External APIs

High-volume gaming transaction platform.

- Led backend development by coordinating team priorities, architecture decisions, provider integrations, and production releases.
- Redesigned backend architecture processing thousands of transactions and large JSON payloads from external gaming providers.
- Optimized PostgreSQL queries and data structures and introduced Redis caching to reduce unnecessary database operations.
- Cut infrastructure costs by approximately 50% while improving backend performance, scalability, and reliability.

Boingo.ai

AI • Web • Maps • Localization

AI-powered real estate discovery and investment platform for Mexico.

- Built personalized property discovery across 7,000+ listings using more than 10,000 matching data points.
- Developed map search, advanced filters, comparisons, saved listings, and detailed property profiles.
- Delivered a bilingual English/Spanish web experience for buyers, investors, brokers, and property managers.

AI Tutor

OpenAI • Node.js • React • Generative AI

Personalized learning platform for educational organizations.

- Integrated OpenAI models to tailor learning experiences to each student's knowledge level.
- Developed AI-generated educational content and images alongside backend APIs and frontend application features.
- Created adaptive learning workflows for educational organizations and individual learners.

PROFESSIONAL DEVELOPMENT

AI Engineering – Current Learning Focus

Ongoing

Advancing in production AI systems, RAG, AI agents, vector databases, and LLM integration to grow as a versatile Full Stack Developer and AI Engineer.
